

Idler Drums

for highly-dynamic Rolling Road Systems
and Road Simulation Test Stands

- Diameter up to 5,000 mm
- Vehicle speeds up to 350 km/h
- With customer-specific Coating to achieve required Friction Values
- Dynamic balancing throughout the entire Operating Range

Idler Drums

for high-dynamic Rolling Road Systems
and Road Simulation Test Stands

Manufacture and Service of the Drums

- Diameter up to 5,000 mm
- Face Length up to 6,000 mm

Achieves highest degree of Balancing
through Dynamic Balancing
in the entire Operating Range

Preparation for the Application
of Customer-specific Coating
or as a Complete System
with Customer-specific Coating
to achieve required Friction Values
