Flaker in In-Dip Technology

Turnkey System with

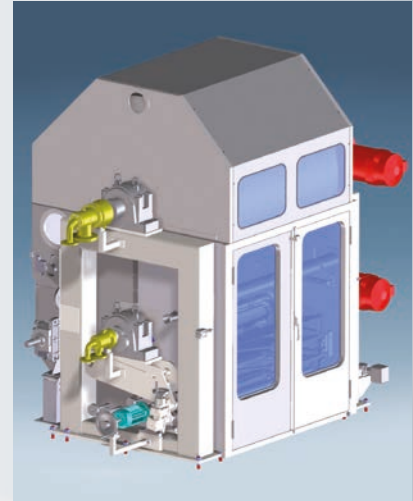

- Electrical Control
- Drives
- Insulation Housing
- Installation

Features

- Heated height-adjustable media tray
- Product intake via a heated application roller
- Transfer to central cooling roller
- Adjustable film thicknesses
- Pneumatically adjustable scraper / doctor blade
- Production of various flake shapes and sizes

Performance data of realised project

- Face length 1,550 mm
- Production speed up to 100 m/min
- Double jacket coater roll ø 500 mm
heated T=140–180°C
- Double jacket cooling roll/drum ø 2,000 mm
- Use in medical processing, FDA approved
