

Inlet and Outlet Rollers for Double-Belt Presses

for the production of practical boards
such as Chipboard, OSB and MDF

- Manufacture and Service
of the Inlet and Outlet Rollers
- Optional supply
of Heated Inlet Rollers
- Drilled surface
for the attachment
of Friction Linings

Inlet and Outlet Rollers for Double-Belt Presses

for the production of practical boards such as Chipboard, OSB and MDF

Manufacture and Service of the Inlet Rollers

Typical dimensions

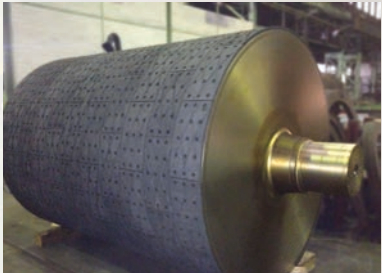

- Diameter up to 2,650 mm
- Face Length up to 4,320 mm
- Weight Approximately 24 tons
- Surface Turned
- Optionally heated

Manufacture and Service of the Outlet Rollers

Typical dimensions

- Diameter up to 2,922 mm
- Face Length up to 4,320 mm
- Weight Approximately 32 tons
- Surface Turned

Optionally drilled for the attachment of Friction Linings
