

## Reel and Winder Drums

for applications in Paper  
and Tissue Production

- Manufacture and Service
- Diameter up to 2,000 mm
- Face Length over 11,000 mm
- Highly dynamically balanced
- Designed to achieve high acceleration ramps

### Optional

- Surface coating
- Grooving
- Perforation and
- Bearings

## Reel and Winder Drums

for Applications in Paper  
and Tissue Production

### Customized Base Construction

- Dismountable screwed base journal or welded bottoms with Shrink-fit pins
- With and without Suction Zone
- With fixed or loose pulley

### Design and dimensioning of the

- Grooves
- Perforation
- Coating
- Bearings
- Acceleration ramps

Achieves highest degree of Balancing  
through Dynamic Balancing in the entire  
Operating Range

### Machine Speed – Class 3000.1

- Top-of-the-line product
- Machine speeds above 3,000 m / min
- Balancing Class 1
