Inline-/Offline-System

## Roller and Cylinder Dryer (Steam)

### Turnkey System with electrical Control

#### Features/Performance data

- Energy efficient and efficient drying
- Wrinkle-free, gentle and low-tension drying method
- Optimum temperature accuracy thanks to modern thermo compressor technology
- Drive the drying cylinders with frequency-controlled single drives

#### Options

- CKS insulation housing and energy recovery
- Feeding machine at machine speed
- Bypassing of the dryer group with towed or driven guide rollers
- Division of the drying group into temperature and drive control groups
- Grease or circulating oil lubrication
- Residual moisture measurement
- Material and process-adapted surface coatings
- Cooling cylinder, integrated or in separate frame
- One or two-sided drying
