

Steel Drums

**Inlet and Outlet roller
for Double Belt Presses for the continuous
production of Sheets and Panels**

- Production and Service of Inlet and Outlet Rollers
- Diameter up to 1,600 mm
- Face Length up to 2,400 mm
- Heated version in Double Shell Design

Optional

- Bearings
- Drive Systems
- Coating

Steel Drums

Inlet and Outlet roller for Double Belt Presses for the Continuous Production of Sheets and Panels

- Manufacture and Service of Inlet and Outlet Rollers
- Diameter up to 1,600 mm
- Face Length up to 2,400 mm
- Customized Surface Coating such as Chrome Plating or Nickel Plating etc.
- Heated version of Double Shell Design with Optimized Internal Spiral Design to achieve required Flow Rates at Low Pressure Losses
- Drive via Journal or Sprocket
- Welded or dismountable screwed Journal
- High heating output
- Homogeneous temperature profile
- Short reaction time
- Optional Head insulation
