New Lathe and Tube-Store

Dear Business Partner,

"... yes, it's Christmas again ...". Time is running fast and we would like to inform you shortly before Christmas in the context of this series on current topics at KRAFFT.

„... I will need a bike to come to the other end ...“

The brisk saying of an employee that the lathe is so long that you need a bike to get to the other end, we cannot confirm. However, we can confirm that in August we had at our Tacchi CTU 3500 lathe a large rebuilt with a completely new machine bed, control and drive of type Ultraturn 3000 by Heinrich Georg. The technical data are:

- | | |
|----------------------------|---------------|
| • Machining diameter | 3.000 mm |
| • Distance between centres | 15.000 mm |
| • CNC control | Siemens 840 D |
| • Workpiece weight | 30.000 kg |

Tacchi CNC lathe in Works 2

Tube-Store

In the middle of September, we opened our new tube store with a small barbecue party together with our employees during an extended lunch break. On a covered area of approx. 350 square meters, we have created a new logistics station for roller tubes.

In future, the incoming pipes will be recorded, checked and entered into the ERP-system. The tubes are then picked and distributed to the production area of plant 1 for processing.

Tube Store as our new delivery point at Works 1

With both measures, we hope to meet the growing demands and we also think that we will continue to improve our adherence to deadlines.

We wish you all the best from Düren for the New Year and hopefully a few contemplative days with your family and friends.

Allow us to give you a personal comment: The current events in the world are very touching and we think it is worth living in a peaceful environment.

John Lennon once sang "Give peace a chance". Let's work on it.

Sincerely your KRAFFT team from Düren.

About KRAFFT:

KRAFFT is one of Europe's leading manufacturers of and specialists for rotationally-symmetric components. The knowledge gained from building plants for the production of paper and cardboard was consequently aligned to new products and product segments:

- KRAFFT Rollers – KRAFFT Walzen** is the company's flagship brand for rollers, cylinders and drums
- KRAFFT Pulleys** pulleys for the conveyance of bulk materials as a drive, tensioning and deflection drum in conveyor belt systems
- KRAFFT Turning Technologies** turning parts and large turning parts are used in plant construction and engineering, shafts and mandrels
- KRAFFT Engineering** Engineering and projecting, turn-key systems
- KRAFFT Services** service and maintenance, repair, assembly
