May 2019

News about our Organisation

Dear Business Partner,

with these lines we would like to inform you about some developments in our organisation.

Franz-Josef Otto – Head of Sales

We are pleased to inform you that Mr. Franz-Josef Otto strengthens our sales team as Head of Sales since beginning of May 2019.

Mr. Otto will be well known to many of you as an experts in our branch. We are highly motivated and look forward to providing you with even better service and support.

You can reach Mr. Otto via +49 2421 9360-153 and the e-mail "vkl@krafft-walzen.com".

Innovation Team - U30

An interdisciplinary innovation team of employees "under 30", composed of all departments of the company (all production areas, design, purchasing and sales), considers different process steps on their optimization potential. All commercial employees have successfully completed their training with us.

As part of these activities, the young employees should also better understand the sequence and dependencies of the work sequences and try to improve them with regard to the overall process. No specifications have been made.

The first result is very promising and will be implemented in a major project this fall.

Obviously, it also helps team building. Well done guys.

The thoughts are free

Currently there are three students working on their thesis (f.r.t.l.):

- Marcel develops an interface and a product configurator for transferring roller data to the CAD system.
- Markus develops a software for roll design based on the functional requirements of the roll.
- Daniel investigates rolls for CFD flow optimization and additive manufacturing.
- Alexander is still studying and follows these three with his thesis.

Good luck to all of you.

Field trip

For some years we have been making an excursion with our trainees to a company where our rollers are used. It often produces things of everyday life. This year they were allowed to visit "their biggest drying cylinder". The picture shows the guys in front of a wound up reel spool.

Sincerely your KRAFFT team from Düren.

About KRAFFT:

KRAFFT is one of Europe’s leading manufacturers of and specialists for rotationally-symmetric components. The knowledge gained from building plants for the production of paper and cardboard was consequently aligned to new products and product segments:

- KRAFFT Rollers – KRAFFT Walzen** is the company’s flagship brand for rollers, cylinders and drums
- KRAFFT Pulleys** pulleys for the conveyance of bulk materials as a drive, tensioning and deflection drum in conveyor belt systems
- KRAFFT Turning Technologies** turning parts and large turning parts are used in plant construction and engineering, shafts and mandrels
- KRAFFT Engineering** Engineering and projecting, turn-key systems
- KRAFFT Services** service and maintenance, repair, assembly
